

CINET PRESS RELEASE

November 1st, 2016

Ref: 09121610294

CINET presents: **Innovations & New Technologies**

A new edition to the CINET Library

The CINET Library, has a new addition; Innovations and new technologies, the newly published brochure provides a comprehensive overview of new technologies presented at Texcare International 2016.

CINET is actively stimulating innovation and supporting exchange of knowledge by performing research and dissemination activities with an international focus, underlining the added value of international cooperation. To define the topics and priorities regarding the subject of innovation, an 'International Research & Technology Program' is set up. Results are reported to CINET members through brochures such as this one. Results are also used for exchange of information within the global industry.

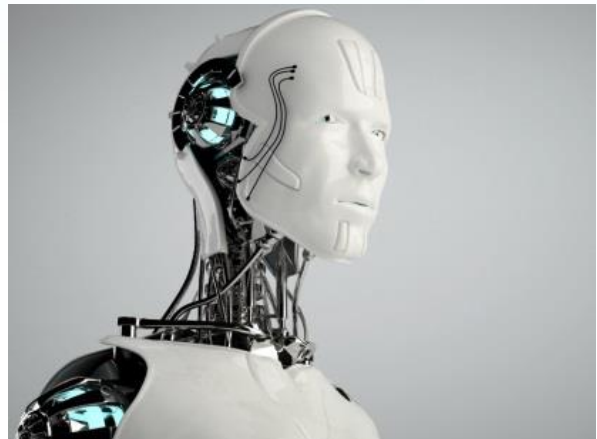

Get your copy now!

The CINET Library, an extensive knowledge database on PTC, is accessible to CINET members; please download the brochure from the website.

... What to expect...

All innovations regarding: Wet Cleaning; Finishing; Automation; Online Technology; Laundry Chemistry; Industry 4.0; ICT and data integration and Automation & Robotics, that were presented at Texcare International are fully explained in the CINET brochure, including examples and information provided by the different suppliers concerned.

Photo: Automation & Robotics are more and more advanced. A soiled side routine normally consists of separation, identification, detection of unwanted items and sorting of the article. All these steps will be automatised in the future.

CINET General News

CINET welcomes new members: now some 90

Promar Textil SRL/ Kromatic Brasov

With 25 years of experience in production and maintenance of a large range of textile materials and applying very new and innovative solutions, PROMAR TEXTIL completes its activity with Professional Laundry Services; under the brand name of Kromatic Brasov.

They provide service solutions to lease, clean and maintain textiles used in all large industrial branches, from hotel linen to uniforms we produce in-house.

Surfchimica SRL

Surfchimica Srl focusses on innovation; supported by experience gained over many years and by teamwork. The goal of Surfchimica is to leave a sustainable future for the coming generations and chemistry has to do its part. The company has embraced this philosophy by focusing its strengths towards research aimed at respecting the environment.

Surfchimica is only at the beginning. The road taken, has led to the development of products for dry cleaning; such as perchlorethylene and hydrocarbon based solvents, as well as products that are water- and/or plant-based, minimizing or even eliminating the use of preservatives, dyes and synthetic fragrances.
