International Flag Ceremony with the Country Award winners 2026

Connecting the WORLD of PTC

From 21 to 23 October 2026 CINET, the international umbrella organization for Professional Textile Care (PTC), brought the international PTC community together at EXPO Detergo International in Milan, Italy. For the organization CINET cooperated with some 40 co-host National Associations, around 20 Country Coordinators and many volunteers. Delegations from all over the world took part in a three-day program, built around one key motto: “Smarter Services Pay-Off”.

The three days each had their own focus: Day 1 opened with company visits in and around Milan, Day 2 offered a full speakers program on Key topics derived from the Strategy Study, and Day 3 was dedicated to the Global Best Practices Awards 2026, including the official presentation of the Global PTC Strategy Study – Roadmap 2050.

KEY Topics + Global PTC Strategy Study – Roadmap 2050

Mr. Michiel Droog explained the accountability and methodology behind the Global PTC Strategy Study: validation first, with artificial intelligence as the instrument. The figures come from the industry itself, verified with the experts involved in three steps. Key topics formed the heart of the speakers program. Each talk was introduced with the findings of the Global PTC Study on that topic, followed by keynotes and panel discussions with experts from around the world. **All with introductions of the Global Strategy Study; Roadmap 2050**

TOPIC 1. Hygienically Clean Textile Services: Why, Who, What, How & When

Standards, safety and certification: hygienically clean laundering, RABC, CERCLEAN® certification and microbiological safety.

How AI Makes Your Business More Successful!

This session is not about explaining what AI is. It is about showing what AI & automation makes possible — for your laundry, your logistics, your invoicing, your quality control, your customer relationships, and ultimately your bottom line. The goal is a spark of recognition: “This is relevant for me. I can do something with this. And I can start now.”

- **AI Experts:** Mr. Amos Rossman (Lumino AI Studio), Mr. Michiel Droog (Netherlands), Mr. Rachit Ahuja (India)
- **Software Suppliers:** Mr. John Buni (CleanCloud, USA), Mr. Lei Pai (Fornet, China), Mr. Alexander Bley (Sewts, Germany)
- **PTC Companies:** Mr. Anup Poddar (BeePee Laundry, India), Mr. Jad Halaoui (Washmen, UAE), Mrs. Eva Maria Sriulina (ASLI, Indonesia), Mr. Patrick Vlooswijk (Netherlands), Mrs. Dawn Avery (NCA, USA), Mr. Stephane Cohen (Hublo, France)

Flag Ceremony & Country Awards 2026 Watch Video

Traditionally the Country Awards were presented during the International Flag Ceremony, representing more than 30 countries. Country winners carried their flag into the presentation room one by one and received their Award & Certificate on stage. Earlier in the afternoon all Official Nominees received their Award & Certificate.

OFFICIAL PRESENTATION: GLOBAL PTC STRATEGY STUDY – ROADMAP 2050 Watch Video

Global PTC market could reach USD 370 billion by 2050

The global market for professional textile care could grow from about USD 135 billion today to about USD 370 billion by 2050, an annual growth of 4.2%, according to the Global PTC Strategy Study "From Wash to Worth". The growth sits in quality, service and automation, not so much in more kilograms of textile.

CINET President Peter Wennekes handed the first copy of the study to Mr. Paolo Cartabbia, President of the Italian umbrella association Assofornitori, in the presence of Mr. Marco Sancassani, General Manager of EXPO Detergo and representatives of leading international suppliers, such as Electrolux Professional, Kannegiesser, Seitz and Kreussler.

Presentation of the first copy of "From Wash to Worth" to Mr. P. Cartabbia, President of Assofornitori, by Mr. P. Wennekes, President of CINET (l), together with Dr. G. Böttger (r).

From Wash To Worth

"Textile is always cleaned. The question is: who cleans it, how well, and what the customer gets with it. Our sector grows faster than the economy that carries it, and that growth sits in quality and service, rather than in kilograms. Giving textile the longest possible life is the key, and it is what a household machine cannot do."

Peter Wennekes, President & CEO of CINET

PTC Growth

Today the PTC industry is worth about USD 135 billion, split into about 40% consumer retail textile cleaning and 60% industrial textile services (ITS) for healthcare, hospitality, industry and business services. On economic and population growth alone the market would reach about USD 240 billion by 2050 (2.4% a year): the floor, not a forecast. Mature segments such as the USA, the EU and China are expected to grow 2.4% to 3.6% a year, emerging segments such as India, Indonesia and Africa 4.5% to 7.5%.

Where the growth comes from

- **Quality and service:** measurable quality control and certification gain weight; customers ask for more convenience and personal service.
- **Lower cost through automation:** automation, robotization, IT and AI lower the cost of professional cleaning, especially in finishing.
- **Longer lifetime, better sustainability:** professional laundering uses far less water and two to three times less energy than washing at home.
- **From the single wash to the closed loop:** rental, leasing and data-driven logistics, strengthened by EU circularity and EPR legislation.
- **Advanced textiles, new perspectives:** new re-functionalizing services with higher added value.

About the study

CINET set up a Taskforce in December 2025. The figures come from the industry itself, through CINET's own knowledge, some 20 country coordinators, 40 national associations and more than 60 interviews, with input from roughly 80 countries in ten world areas. The result is the flagship report "From Wash to Worth", a Summary edition, seven Key Topic reports and a library of area and country reports: some 100 reports in all, accompanied by an Accountability & Methodology Report. Orders: cinet@cinet-online.com.
